DESCRIPTORS: Automatic, *Arc welding, *Pipes, Industrial equipment, Electromagnets

The present report covers an automatic "fire cracker" butt welding process which makes it possible to produce perfect root and finishing beads in any welding position. Its mode of operation is based on the control of the arc column by auxiliary magnetic fields whose theory is explained. A description is given of the equipment which has been developed and field-tested with pipe diameters (Machinery--Manufacturing, TT, v. 9, no. 10) (over)
